

Addendum No. 1

March 10, 2014

Official Notice No.6755 Aircraft Noise Monitoring System Upgrade Consultant Request for Qualification:

Questions:

1. Can further information on the existing aircraft noise management system be provided prior to the submission of the proposal on April 10 including;
 - a. Operations manual of the hardware, including the seven permanent Noise Monitoring Terminals (TRACOR Model 40000A);
 - b. Operations manual on the software package currently being used.

This information will be made available to the successful respondent.

2. Have any aircraft operation noise management systems and respective vendors already been recently evaluated and documented as the potential successor to the existing system?

No

3. Are there any specific requirements for this project that certify a firm as DBE?

DBE Information is found in Attachment A of the announcement.

4. Will bidders be provided a list of certified DBE firms and their respective products/services?

No.

Please contact Milwaukee County Office of Community Business Development Partners (CBDP) at 414-278-5104 for assistance in identifying DBE firms.

5. If a certified DBE firm cannot accept the bidder's contractual terms and conditions, is that condition considered a good faith effort on the part of the bidder? Is it sound justification for rejecting a proposal from a DBE firm?

Please contact Milwaukee County Office of Community Business Development Partners (CBDP) at 414-278-5104 with your DBE questions.

6. Will the selected consultant be responsible and contractually obligated for the installation/construction of the selected aircraft operation noise management system or will the Airport Division of Milwaukee County's Department of Transportation be entering into contracts with the selected firms for the installation/construction?

Contracts will be with Milwaukee County.
